Name of the Guide & Designation	Y.Sowjanya		
Domain of the Project	WEB DEVELOPMENT		
Title of the Project	PORTFOLIO		
Tools/Components Required	Languages used HTML , CSS , Java Script		

Abstract:

A PORTFOLIO is a compilation of materials that exemplifies your beliefs, skills, qualifications, education, training, and experiences. It provides insight into your personality and work ethic. It is closely related to Online Resume or C.V. This abstract aims to provide a comprehensive guide to the design and development of portfolio websites, including their purpose, essential features, and best practices. The website highlights the role of HTML, CSS, and JavaScript in building portfolio websites and emphasizes the significance of responsive design and user experience.

There are many areas where a website portfolio is more important than others. If you find yourself in one of the following, it's safe to assume that you need a portfolio like a book needs words :

1 . Having your own website means customers are always able to find you and if interested, reach out for you.

2 . For example , portfolio is a great way for photographers, designers, developers and a wide range of artists to present their work online. It lets you reflect your identity through your works – photos, graphic design, sketches, etc.,

3 . It aims to attract potential clients, employers, or collaborators by demonstrating the quality of work, problem-solving skills, and commitment to excellence in web development.

Keywords: Responsive , Web Development , Case Studies , Portfolio Management system.
